

# Cycle Safely

## with Bicycle Action Committee

As a cycling enthusiast, I know firsthand the importance of bicycle safety, which is why in 2013 I started the charity **Bicycle Action Committee, Inc.** This charity works with various **cities, governments, and regulatory agencies** to **implement changes** in our roads to **insure bicycle safety and awareness.**

To further promote our message, our committee began **designing bicycle clothing** that is **branded for bicycle safety** and contains **safety monikers.** We also have a US Patent for visual education for our apparel.

We partner with participating cities that allow us to use their city seal and colors. We then raise money from the private sector and make 100 outfits. Any money we raise in excess of the cost of the outfits is contributed back to the city to **promote their bike initiative programs.** We are in **20 cities in Florida** and **expanding.**

We are proud to share that **EisnerAmper** has been our biggest supporter. In coordination with Marketing Director Angela Duffy, we have designed an **EisnerAmper cycling outfit** available for colleagues to purchase.

If you are interested in **implementing our program in your city** or **ordering the outfit** please contact me – an EisnerAmper group order will be placed very soon.

Be safe!

**Richard A. Cahlin**
